

**Product description:**

FRP molded grating is one kind of plate material which use unsaturated polyester resin as matrix,and use fiberglass roving as frame,and then at the customized mold through the special process to made.

**Product advantage:**

1. Anti-corrosion of many kinds chemicals,no rust,long time useful,and not maintenance
2. Anti-flaming
3. Insulation,non-magnetic
4. Have light elasticity,can reduce the persons feeling of fatigue,increase the comfortable sensation,improve the working efficiency
5. Light weight,high strength,and easy to cutting and installation
6. Color same inside and outside,and easy to selection,also can customized color,change the place environment
7. Great designability,many sized and size stable.

**Application:**

Chemical,Petrochemical,Electricity, Hydraulic engineering,Urban construction,Sewage treatment plant and other corrosion places. Walkway,Bridge plate,Industry terrace,Working platform,Isolation strip,Stairs step and other place.

**Production data**

Thickness (mm)	Mesh (mm)	Weight (kg/m <sup>2</sup> )	Mold size (m)
25	40*40	11.5	1*4
			1.22*3.66
	38*38	12	1*4
			1.22*3.66
30	40*40	14	1*4
	38*38	16	1.22*3.66
38	40*40	18.5	1.22*3.66
			1.22*2.44
	38*38	20	1.22*3.66
			1*4
50	50*50	21.6	1.22*3.66
	38*38	27	1*4
65	50*50	29	1.22*3.66
	38*38	36	1*4
			1.22*3.66
38 cross mesh	38*19	23	1.22*3.66
30 cross mesh	50*25	14.5	1.22*4.025
	38*19	18	1*4
25 cross mesh	50*50	12	1.22*3.66
			1*4
	38*19	16	1*4
